Daniel Winterbottom, RLA, FASLA, holds a BFA from Tufts University and a MLA from the Harvard Graduate School of Design. His research interests include the effects and role of restorative/healing landscapes in the built environment, gardens as cultural expression, play for all and applied service learning. He has been published widely including articles published in Northwest Public Health, Places, New York Times and Landscape Architecture Magazine. He has authored “Wood in the Landscape” and his book “Designing Therapeutic Gardens” with occupational therapists Amy Wagenfeld will be released in April 2015. He has contributed to several books on children’s playscapes, sustainable design, community gardens, therapeutic landscapes and community service learning. His therapeutic garden projects can be found in many cities within the US and in Mexico, Guatemala, Japan Bosnia and Herzegovina and Croatia.
